

A Note to the DJ / Lighting / Sound

Hey Man,

Appreciate you checking this out real quick:

Heads up there may be another event going on and their DJ is reading this too.

We need to control the BASS especially when the other party is doing a blessing or toasts. Most or ALL DJ's who read this get it. Hopefully you can respect our needs here and self-manage.

(So far, no one has been unplugged, but I have empowered my managers to do it if you are not on-board with us.)

If you need lots of power, please be sure to ask a manager. I tried to make it easy for you, but it's better to be safe than sorry...

Also, be careful to use only Gaff Tape...NO DUCT TAPE...it will strip the wax off the floor, costing you money and aggravation...usually more than \$350 to repair stripped wax from using the wrong tape. We may be able to sell you gaff tape, but most DJ's have their own. Just Ask.

Also, if you need to smoke, please do not smoke in the front of the building or near other guest areas.

Thanks!

Roger Igo
